This is in response to application filed on March 04, 2002 in which claims 1-70 are presented for examination.

**Status of Claims**

Claims 1-70 are pending.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-44, drawn to data manipulation, classified in class 707, subclass 101.
- II. Claims 45-54, drawn to multi-computer data transferring, classified in class 709, subclass 200.
- III. Claims 55-70, drawn to file processing, classified in class 707, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, Group II and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Group I, Group II and Group III as shown above are not disclosed as capable of use together and they

Art Unit: 2171

have different modes of operation because to their different classifications in the art.

Therefore, the restriction is proper.
